Homepage Section:

1. The overall color scheme of the homepage shall be consistent with the color of the company logo.

2. Delete the first row entirely; do not keep the phone number. Move the language selector button to this lower bar, placing it at the far right of "Get a Quote".

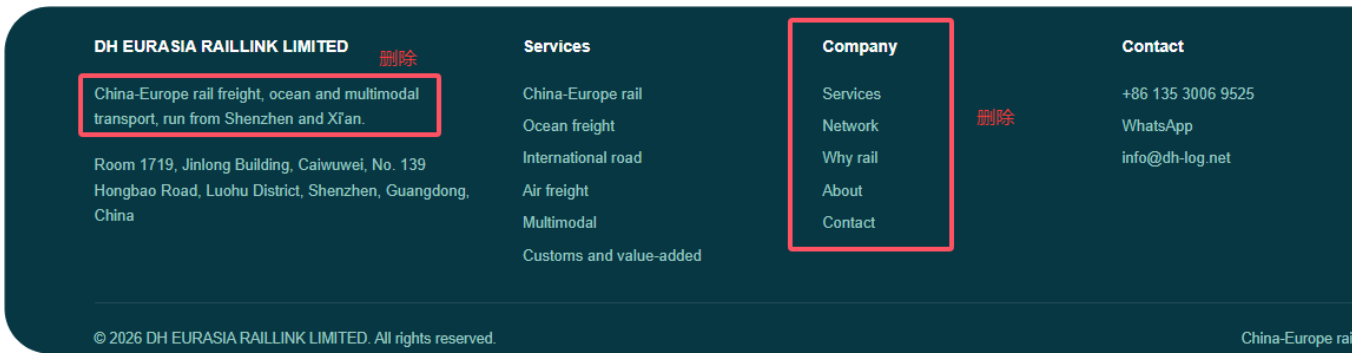

3. Replace the background image of the second section with a photo related to our main railway business.

4. Change "Request a quote" to "Get a quote".

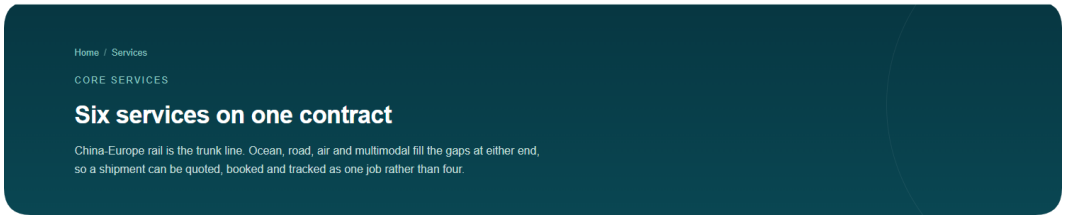

5. Remove these two items.

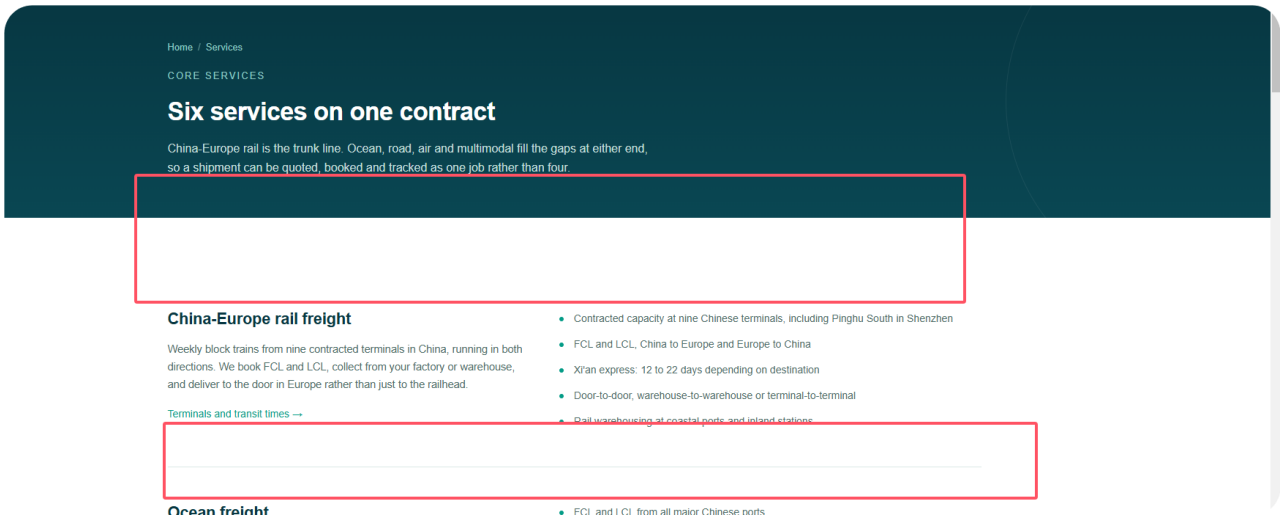

Services Section:

1.Replace the background image with a logistics-related picture.

The paragraph spacing between each service item appears too wide; reduce it slightly.

Network Section:

1. The text here needs adjustment. Instead of listing only six European destination stations, it should state coverage across all of Europe.

2.Adjust the background to a logistics-related photo.
